
Scenario-dependent smooth MW renormalization
Repopulated catalogs (fragile & resilient)
INPUT - HDF5
Classify subhalos: point-like or extended
Catalog reduction cuts
Extended subhalo lists
Raw CLUMPY rendering
Boost factor for each repopulation
OUTPUT - CSV
OUTPUT - FITS
Final $J$-factor template
Point-like HEALPix map
Compare rendered vs. catalog $J_s$ and correct $\rho_s$ in lists
Smooth MW + extended subhalos HEALPix map
Corrected CLUMPY rendering
